Experience

Multiplymii — Edge on Demand

Software Engineer / Individual Contractor

Philadelphia, USA

Nov 2025 – Aug 2026

- Engineered the client portal platform to streamline the onboarding of potential customers.
- Maintained and debugged Django web admin systems to ensure operational stability.
- Designed and developed mission-critical Celery jobs to handle core customer operations.
- Collaborated closely with sales teams and clients to migrate a legacy jQuery codebase to a modern React/Next.js stack.

AS White Global — Symbio

Platform Engineer / Individual Contractor

Australia

Jul 2025 – Jul 2026

- Maintained the ITSM Platform for Australia Broadband end-users, ensuring high system availability.
- Partnered directly with clients to deliver customized platform enhancements and technical fixes.

Hyperstacks

Senior Software Engineer

Cagayan De Oro, Philippines

Feb 2025 – Jul 2025

- Created robust API solutions for internal and external banking applications, including HigalaPay, MCCB, and DBI.
- Improved API response times by 35–50% and significantly enhanced overall system performance.
- Architected a secure, bi-directional integration service connecting a NestJS backend directly to NetSuite via custom SuiteScript 2.x RESTlets.
- Maintained and optimized legacy codebases, reducing processing delays by over 40% and cutting database query execution times by 30%.

Nibble Philippines

Software Engineer / Freelance

Cagayan De Oro, Philippines

Feb 2023 – March 2024

- Built a Laravel backend platform to automate and manage mass content publishing across multiple WordPress sites.
- Developed custom WordPress plugins to streamline endpoint authentication, automated publishing, and content syncing.
- Orchestrated multi-site API integrations, enabling seamless bulk scheduling and reducing manual publishing effort.

Fligno

Mid Level Software Engineer

Cagayan De Oro, Philippines

Jul 2021 – Feb 2025

- **Spek (Development Lead):** Led API infrastructure development and engineered a specialized DSL to streamline Stripe payment integration.
- **Greenlife (Software Engineer):** Developed high-performance Laravel RESTful APIs to modernize SOAP integrations and optimized the client's legacy vanilla PHP codebase.
- **Give N Get (Development Lead):** Directed backend migration from Django to Laravel with zero data loss, and architected a distributed CRON service processing 1.2M daily operations for 250,000+ users.
- **Access ChangeGPS (Software Engineer):** Built core API infrastructure using HonoTS and BullMQ. Engineered an automated document management workflow using a Blueprint system with letter merge, implemented progressive web optimization via IndexedDB caching, and handled legacy system performance modernization.
- **ABC Learning:** Led the design and deployment of custom integration pipelines between NetSuite and external third-party platforms using SuiteScript 2.x (RESTlets, Suitelets, and Scheduled Scripts) to enable bi-directional, real-time data synchronization.

Huawei / Smart Telecoms

Associate Systems Administrator

Philippines

Aug 2019 – Dec 2019

- Collaborated with network teams to deliver high-quality service solutions and optimize network infrastructure.
- Implemented VoIP and CTI applications, managing complex customer integrations and system configurations.
- Diagnosed and resolved technical hardware and software issues to minimize operational downtime.

Department of Information and Communications Technology
Equipment Installer

Philippines
Mar 2018 – Jun 2018

- Prepared system components and installed wireless networking equipment in public spaces while strictly adhering to safety protocols.
- Executed systematic troubleshooting and diagnostic procedures to resolve equipment malfunctions efficiently.
- Managed end-to-end installation processes, from initial layout planning to final implementation.

Education

AMA Computer College
Computer Science, Bachelor's Degree

Cagayan De Oro, Philippines
Aug 2018 – Jun 2023

- GPA: 3.5

Skills

Programming Languages: JavaScript, TypeScript, Python, C#, Lua, PHP

Libraries / Frameworks: ReactJS, NodeJS, ExpressJS, Flask, Django, Beautiful Soup, PyTorch, TensorFlow, Svelte, Vue, Angular, Laravel, CodeIgniter, Phalcon, Symfony, NestJS, HTMX, AlpineJS, Suitescript

Tools / Platforms: Git, Mercurial, Docker, Podman, Kubernetes, Wordpress, Netsuite, Servicely, ServiceNow

Databases: Postgres, MySQL, Oracle DB, SQLite

Projects / Open-Source

Video Proxy Server (*HTML, JavaScript*): Built a Node.js proxy server with range request support to stream videos requiring specific headers, fully supporting seeking and buffering.

The Wash (*Svelte, TypeScript, CSS, JS, HTML*): Developed an anime and cartoon streaming application that scrapes and aggregates data from various sources.

M3U8 CORS Proxy (*Python, Docker*): Created a Python proxy server that adds CORS headers to M3U8 playlist files, allowing restriction bypass in browsers.

Document Converter Lib (*C#*): Engineered a document converter library to convert DocX files to PDF without relying on Microsoft Office Interop.

Capacitor NFC (*Java, Swift, TS*): Developed a native Capacitor plugin for handling NFC connections natively on both iOS and Android platforms.

Python Learning Resources & Coffee Beans ID (*Python*): Created a learning repository for Python students and conducted localized AI research for Nescafe.

Certifications & Awards

HackerRank: Frontend Developer (React), Software Engineer, JavaScript (Intermediate), SQL (Advanced), REST API (Intermediate)

Udemy: Master NestJS Ultimate Masterclass 2025, NestJS Zero to Hero – Modern TypeScript Back-end Development

EF SET: English Certificate

Honors: Guest Speaker at Liceo De Cagayan De Oro for Python Introduction
